

# Cloud CCTV Product Brochure

Keep your premises secure

## What is CamCloud?

CamCloud is a Cloud CCTV Management system. A direct connection is setup between the camera to the cloud with 24/7 recording. All footage recorded is encrypted.

The CamCloud portal then allows you to access your CCTV footage at anytime, wherever you are. This can be done via desktop or the mobile app.

## The Benefits of Cloud CCTV

- Reduced cost compared to an on premise system
- Accessibility anytime, anywhere via desktop or mobile app
- 24/7 Encrypted recording
- Software is always up-to-date and secure
- No on-premise hardware needed for management
- No hardware maintenance or failure

Expected uptime  
of 99.9% via  
Amazon Web  
Services

Here is an example of the CamCloud portal on desktop, table and mobile:

The animated preview bar lets you hover over any event on your timeline; making it easy to find specific footage.

All recorded footage can be retained for a time period of your choice. We offer 7, 14, 30, 60 and 90 day retention packages.

## CCTV Cameras

Alongside a CamCloud package, we offer the choice of two Amcrest CCTV cameras.
