

Conversations in Teams

Conversations are one of the key features of Teams, allowing each Team to have a centralised discussion that is saved and easily searchable. Conversations are the central component where all teamwork is recorded—from file sharing to video calls.

The use of @mentions allows you to tag participants or even whole teams to notify others. Users that look at Conversations will easily see where they have been mentioned through the red @ symbol to highlight areas of importance to them. On top of this, your desktop app will notify you through an alert. As well as tagging, users can 'like' content and share emoticons or GIFs.
